

SMART & SIMPLE

valve monitoring system

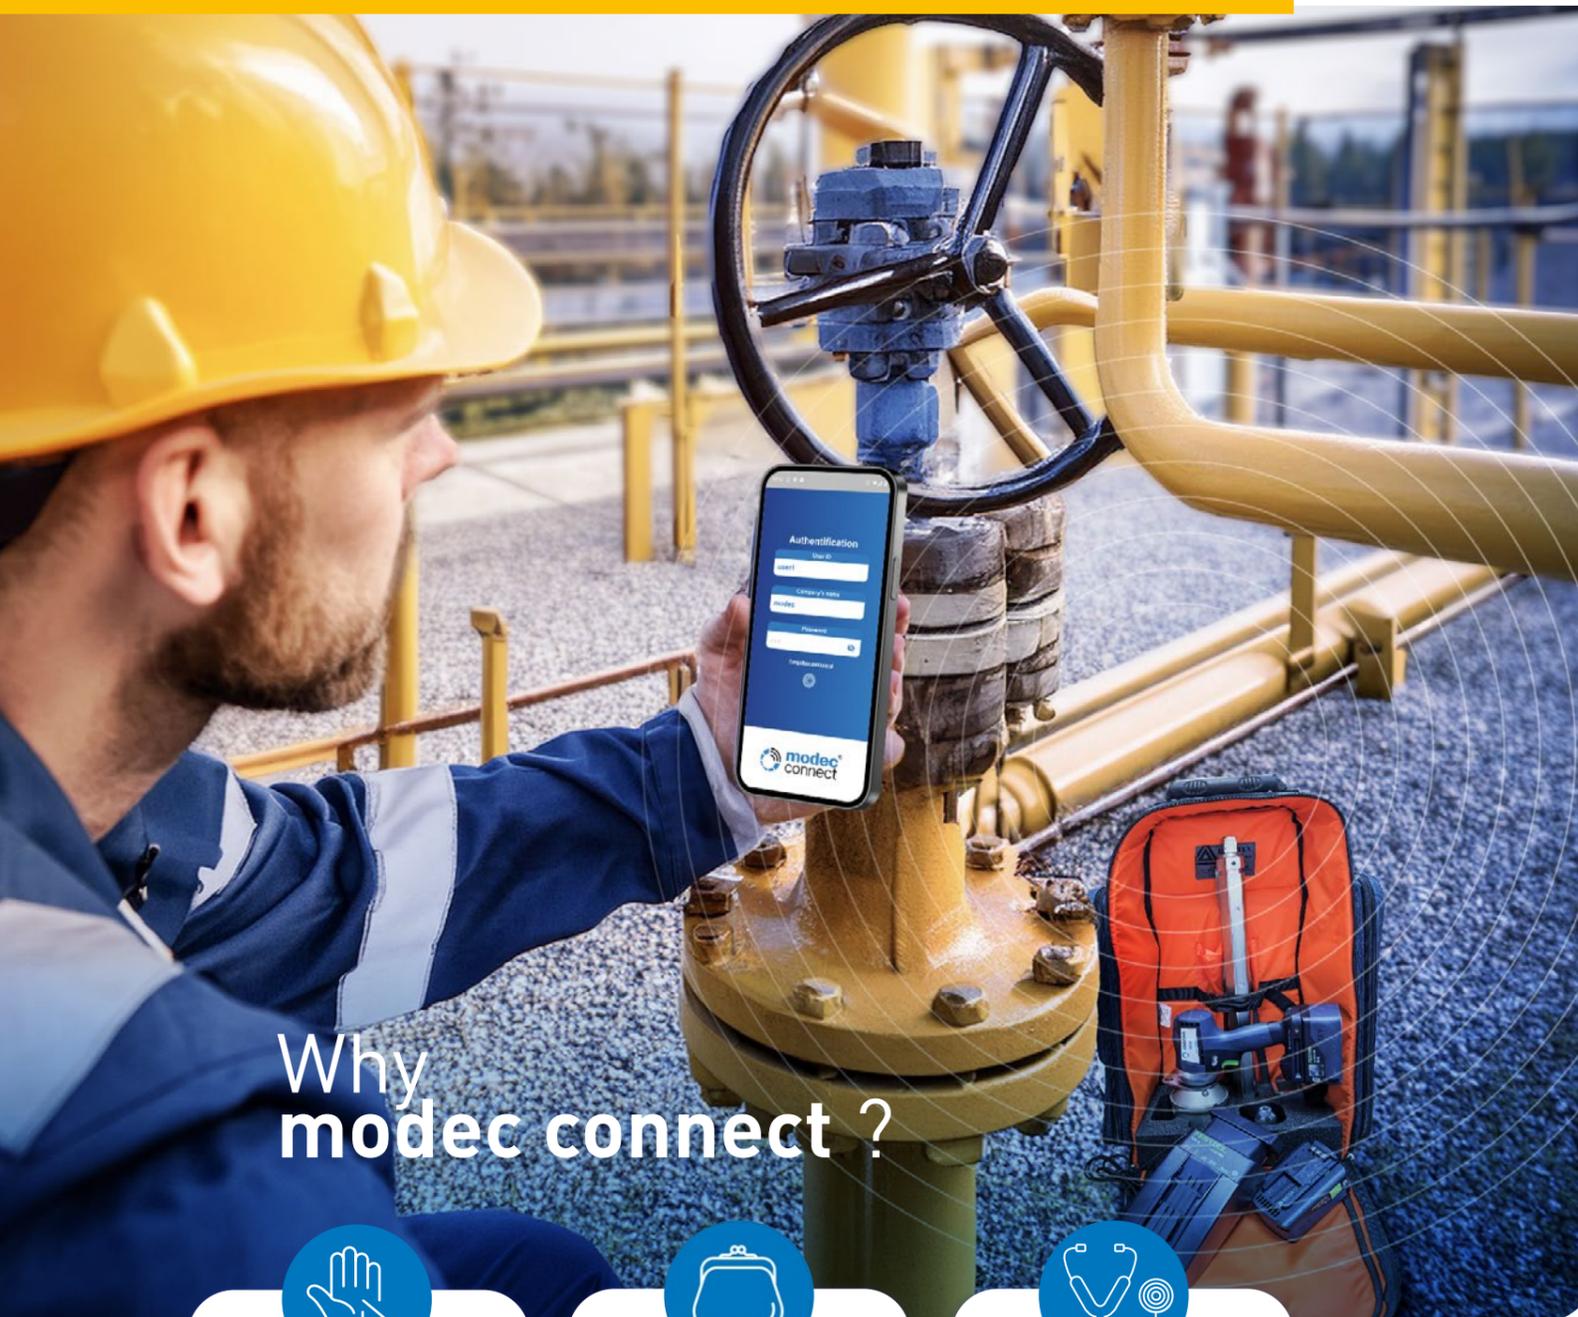

get ready for AI

⦿ Don't wait for shutdowns and accidents, start to make manual valve monitoring your priority

- 
 WATER
- 
 OIL & GAS
- 
 POWER PLANTS
- 
 MINING
- 
 PULP & PAPER
- 
 PETROCHEMICAL

Why modec connect ?

Decrease unplanned shutdowns

Reduce Opex and Capex

Expand equipment lifetime

Plug and Play installation

- The installation of the modec connect system requires **no modification to your existing setup**.
- Simply use a **portable valve actuator** to start collecting data with the smart sensor.

Manage your valve data

- **Collect key data** : torque, revolutions and speed
- **Centralize data** for easy access to valve information anytime, anywhere
- **Build a relevant database** and get ready for AI

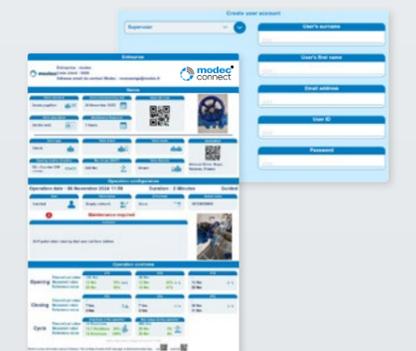

Monitor valve status

- **Perform preventive maintenance** : Analyse operation curves to assess valve condition and proactively maintain your network.
- **Build a relevant database and get ready for AI**

Trace your operations

- **Generate reports** effortlessly to trace **daily operations**
- **Coordinate teamwork** for a better efficiency

What makes modec connect the smart choice for monitoring your manual valves ?

- Intuitive app
- Compatible with GIS Softwares
- Real-time data measurements
- Adapted for all type of valves
- Plug & Play solution
